

FEATURES

1. External Bleed Screw with Removable Metering Pin – allows for easy cleaning of the metering pin without disassembling the valve (excluding the jar top model).
2. External bleed screw – for manual operation.
3. Internal bleed handle – for manual operation.
4. Removable inlet cap – for easy conversion from globe to angle-style valve (1 ½" & 2" models only).
5. Captured pluger - Allows for the solenoid to be removed without losing internals parts.

SPECIFICATIONS

1. Pressure – 20 PSI minimum to 150 PSI
2. Voltage – 24 VAC 60 cycle, .4 amps inrush, .2 amps holding

BEFORE INSTALLATION

1. Flush system thoroughly before installing valves.
2. Make sure you have sufficient water supply, pressure & flow.

INSTALLING VALVE WITH ADAPTERS

1. Wrap adapters with 2 to 3 complete wraps of Teflon® tape around threads.
2. Hand tighten adapters into valve.
3. Carefully tighten adapters one additional turn past hand tight.
4. Do not use flow control handle and solenoid as a lever.

CAUTION: DO NOT OVER-TIGHTEN ADAPTERS!

OPERATING VALVE MANUALLY

1. Open external bleed screw counter clockwise – water will exit screw hole and valve will open.
2. Open internal bleed handle – valve will open.
